

Bridgewater of Wesley Chapel CDD

HA5 Project FAQs

1. **Transportation** – You will see Shuttle Stop Signs move around each day. (Shuttle Stop maps are posted on the website for each phase). The Shuttle van will be driving 24/7 between all the stops including the playground. The Shuttle van will have a white magnet on the sides that says *Whitaker Contracting Shuttle*. If you have a special need for transportation (need to be picked up from your residence vs. the Shuttle Stop), please call the below numbers:

Monday-Friday	8am - midnight	813-701-2050 (mention that you live in Bridgewater, your specific neighborhood, and your need for special transportation)
Monday-Friday	Midnight – 8am	228-424-7990 or 256-673-5478
Saturday & Sunday	9am-9pm	813-701-2050 (mention that you live in Bridgewater, your specific neighborhood, and your need for special transportation)
Saturday & Sunday	9pm-9am	228-424-7990 or 256-673-5478

2. **Schedule.** If you are inquiring about schedule or schedule changes, please continue to check the website <https://bwcdd.org/> or watch more updates on the electronic message boards.
3. **School bus stops.** We have been working with the Pasco County Schools and all parents should have received a notice about the location of the temporary bus stops on certain days. All school bus drivers have a copy of the map and the bus stop changes. Schedule changes are also posted on the website. If you have any additional questions regarding school bus stops, please call 813-468-4576 and ask for Amy.

4. **Garbage Collection** – Waste Aid has been notified and has the schedule. If your phase is being done on your garbage or recycling day, you will receive service on the next scheduled day that you normally would receive service.
5. **UPS** has been notified of the phasing and schedule.
6. **Contractors-** you will see both Whitaker Contracting and ISG Contractors on site for this project.
7. **Special Needs Questions/ Project Questions NOT relating to transportation**, please call Kris @ 352-303-3138 or Stephen @ 727-333-5897.
8. **What is HA5?** HA5 is a high density mineral bond and is used by cities, counties and state departments of transportation to preserve asphalt and make the roads last longer. It protects the roads from the sun and rain which both cause damage to roadways. It also makes the road look new for a very long time.
9. **Is HA5 a safe product:** The HA5 product being installed on the roadways within Bridgewater CONTAINS ABSOLUTELY NO COAL TAR. The product being installed is asphalt based meaning it is similar in substance to the original asphalt road that was constructed. Researchers have determined coal-tar sealers can have a negative health impact to the public and multiple cities and counties have now banned their use.
10. **Why do I have to stay off the road for 24 hours?** HA5 needs sufficient time to completely cure.
11. **What happens if there is an emergency?** Emergency vehicles will be allowed access to the neighborhood 24/7

12. **Water.** Please turn all outside water OFF beginning the day before your phase. You can turn it back on the day after your phase is completed.

13. **Phase MAP is on next page.**

14. **Inclement Weather:** What happens during inclement weather? There will be times when the weather may not allow the treatment to be done, and sometimes final decisions won't be made until early hours of the morning of the scheduled treatment. Since that is the case, residents should park at the playground as planned, regardless of anticipated weather conditions, and notices reflecting any changes will be posted on the message board and on the website.

Bridgewater

Each color is 1 Day, for a total of 10 days.
